

Transforming File Transfer Operations with a Cloud-Native In-House MFT Solution

Business Challenges

A leading enterprise faced higher license and support costs associated with third-party Managed File Transfer (MFT) solutions such as Sterling Integrator B2B, Connect:Direct, eDEG, and Axway. Additionally, the client sought to eliminate service dependencies and consolidate operations through a unified, scalable platform that could support cloud-native deployments across AWS and GCP.

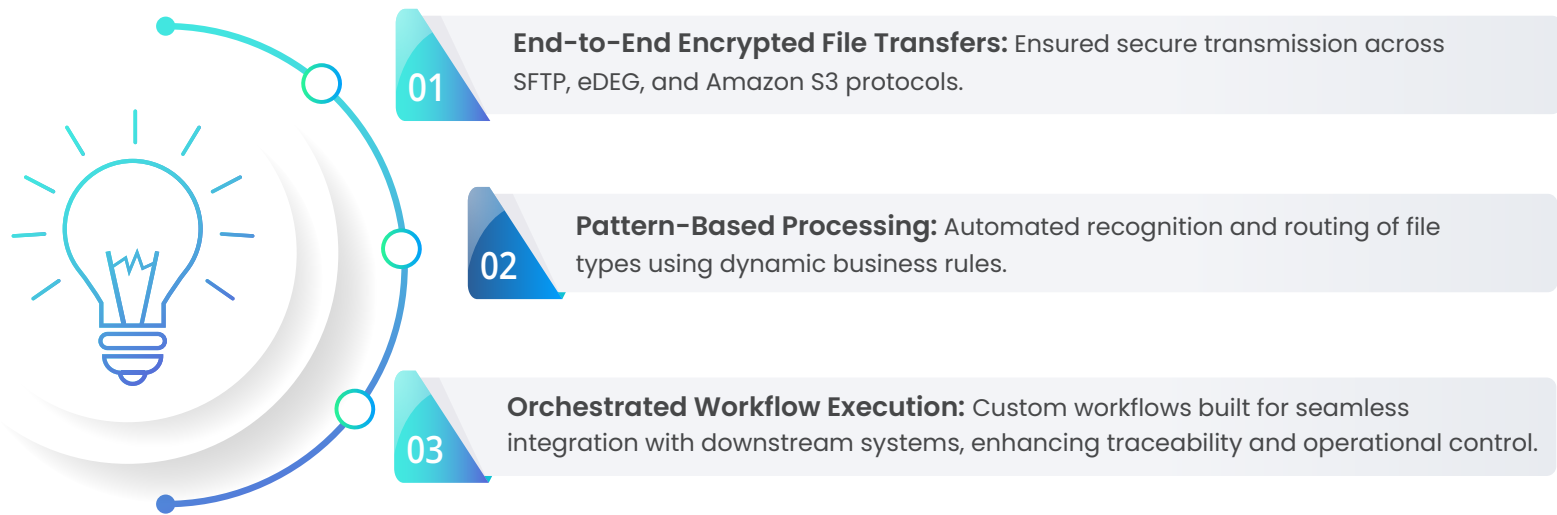

Key Pain Points:

Saksoft’s Solution

To address these challenges, a **bespoke, cloud-agnostic MFT solution** is built leveraging a **microservices-based design**, enabling secure, scalable, and cost-effective file movement.

Core Capabilities Delivered:

Business Impact & ROI

The solution yielded significant financial and operational gains for the client:

01

Zero Licensing Overhead:

Eliminated annual licensing expenses associated with commercial MFT tools.

02

Lower Support Costs:

Reduced L2/L3 support efforts through automation and internal platform ownership.

03

No service support dependency

Gained complete control over service delivery, reducing reliance on third-party support timelines.

Technology Stack Highlights

Component	Details
Architecture	Cloud-native, microservices-based
Transfer Protocols	SFTP, eDEG, AWS S3
Cloud Enablement	Deployable across AWS & GCP
Security & Compliance	Encrypted data transfer, audit-ready

Future-Ready Starts Today

Whether you're struggling with performance, scalability, or developer ramp-up—Saksoft helps you modernize with confidence.
